

# BULKAN TIMBER WORKS INC.

## PRODUCTION PROCESS

**Stage 1 – Logs arrive at the Factory**

**Stage 2 – Logs are graded and checked for quality**

**Stage 3 – Logs are cut to required length and debarked (ready to mill)**

**Stage 4** – Logs go to the Mills and are cut to the required sizes

**Stage 5** – Graded and Cross-Cut, ready to be Kiln Dried

**Stage 6** – Bundled and placed in Kilns for about 3 weeks to extract as much moisture as possible

**Stage 7** – Comes out of the Kiln and are de-stickered, ready to be machined.

**Stage 8** – Goes to the Moulder, and the desired profile is achieved.

**Stage 9** – Packed and Bundled ready to be sold/shipped or used in further value addition
